

Basics of Ozone

May 13, 2004

8:00 a.m. – 10:00 a.m.

Workforce Development Building
864 Collins Road
Jefferson

On average, you breathe 15 times each minute. Most of the time, you do it without even thinking. Breathe in, breathe out. It's that easy. But what are you inhaling each time you take a breath? Is it fresh, clean air or does it contain invisible hazards? When it comes to air quality, **what you don't know can hurt you, but what you do know can protect your health and our environment.**

For that reason the Jefferson County Economic Development Consortium is sponsoring the seminar the “**Basics of Ozone**”

The topics of this seminar will be:

INFORM – We will supply you with information on air quality and what an attainment and non-attainment classification means for Jefferson County.

IMPLICATION – What will happen if Jefferson County becomes a non-attainment county as it relates to business and our quality of life?

STRATEGIES - What we can do to preserve our attainment status and strategies to prevent our becoming a non-attainment county.

RSVP by May 9th to (920) 674-8711.
